Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the examiner has considered applicants' amendment filed January 24, 2005, and the argument therein. In light of said arguments, and upon further consideration of the references relied upon for the rejections of record, the examiner has withdrawn said rejections.

U.S. Patent 5,583,263 to Muthusamy et al teaches a multi-step process for preparing amyl ketones, i.e., the process is conducted using three steps. There is no motivation found in the reference to move from such a multi-step process to a single-step process, as claimed herein by applicants. In addition, the examiner concedes that one of ordinary skill would not have been motivated to combine the process taught by Muthusamy et al, with the process described by Letts (US 4,739,122), since Letts teaches a process wherein amyl ketones are *heterogeneously* produced, using a fixed bed catalyst comprising a reduced copper oxide on gamma-alumina, i.e., a materially different catalyst from the basic aldol catalysts taught by Muthusamy et al. Accordingly, the instant claims are now allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
